

Federated GRC: Specialized at the edges, Unified at the core.

GovernanceVare® Solution Brief

The Intelligent Platform for Governance Management

Strengthen governance oversight, enhance accountability, and support strategic decision-making. 

Designed in alignment with globally recognized governance frameworks and industry best practices.

Enabling organizations to strengthen governance, enhance transparency, and support strategic decision-making at the highest levels of leadership.

Strengthening Governance for Better Strategic Outcomes

EXECUTIVE OVERVIEW

GovernanceVare helps organizations streamline governance activities, improve oversight, and strengthen accountability through a centralized and structured governance management platform.

With a single integrated solution, organizations can manage policies, governance documents, approvals, committees, contracts, and compliance obligations while enabling transparent decision-making, effective oversight, and real-time reporting for management and stakeholders.

STRONG VALUE PILLARS

- 1. Enterprise-Wide Governance Visibility**
Centralized visibility into governance activities, decisions, and performance across the organization.
- 2. Full Document Lifecycle Control**
Manage document creation, review, approval, versioning, and access from a single platform.
- 3. Contract Lifecycle Management**
Track contracts, approvals, obligations, and renewal dates to ensure compliance and accountability.
- 4. Governance Process Control**
Adapt governance structures, roles, workflows, and approval hierarchies to organizational requirements.

THE GOVERNANCEVARE ADVANTAGE

Centralized Governance Management

Manage governance documents, contracts, approvals, and oversight activities from a single platform.

Enhanced Governance Visibility

Gain real-time visibility into governance activities, approvals, compliance status, and organizational performance.

Executive & Board Reporting

Provide leadership with actionable insights through executive dashboards and governance reports.

Standardized Governance Processes

Maintain standardized governance activities and approvals across departments.

A Unified Platform for the Complete Governance Lifecycle

PLATFORM MODULES

Home

01

Central hub for updates and quick access to other modules.

Document Library

02

Centralized repository to store, organize, and access organizations approved policies and documents securely.

Governance of Documents

03

Provides structured control over the creation, versioning, access, and governance of organizational documents through a centralized and secure governance framework.

Checklist

04

Create and monitor compliance checklists to ensure compliance with the applicable regulatory and internal policies and guidelines.

Contracts

05

Maintain and track contracts, renewal dates, obligations, and related approvals in one place.

Approvals

06

View and manage approval requests for key stages of the governance management lifecycle.

Dashboards

07

Gain comprehensive visibility into governance activities through role-based, customizable dashboards featuring real-time metrics, approvals, compliance status, and oversight insights.

Admin Center

08

Set up user roles, manage access permissions, establish risk framework and configure other system settings.

The Complete Platform for Governance Excellence

Empowering governance teams with streamlined processes, enhanced oversight, and informed decision-making.

CORE DIFFERENTIATORS

Built on International Standards

GovernanceVare is designed in collaboration with governance professionals and technology experts to address real-world governance challenges, combining industry best practices with modern technology to deliver an efficient, transparent, and effective governance management experience.

GovernanceVare Intelligence

Purpose-built AI that enables intelligent search and instant access to governance knowledge, policies, approvals, and organizational documents.

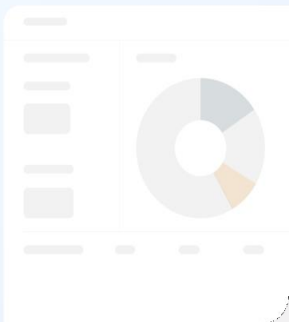

Industry - Leading Security

Advanced platform security measures have been integrated into GovernanceVare. These security measures encompass Single Sign-On (SSO), Multi-Factor Authentication (MFA), CAPTCHA, TLS protocols, AES encryption, password management, and session timeouts.

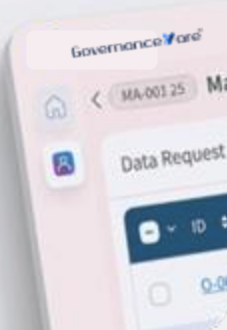

Third-Party Integrations Support

GovernanceVare allows integration with third-party applications, including Active Directory, ERP systems & others.

Dedicated Local Support Team

Reliable, SLA-backed local support from governance and product specialists to ensure smooth operations and user success.

GovernanceVare Intelligence

Reduce Manual Administration, Smarter Policy Governance

GovernanceVare AI reduces manual effort, strengthens governance structure and policy enforcement, and supports better oversight decisions while human oversight and complete audit trails keep you in control.

CORE AI FEATURES

AI Model Options

Keep full control of your data with a powerful AI engine, always within your security and compliance boundaries.

Context Aware Intelligence

Wherever you are in GovernanceVare AI is right there: summarizing, explaining, suggesting. Context-aware help that never breaks your flow.

Chat with GovernanceVare

Ask questions in plain language. Type a question like **“Which policies are overdue?”** or **“Show me policy exceptions across the organization”** and get instant answers without searching through multiple screens.

Document Summary

Pulls together document, policy, contracts and checklist details into a clear summary in one click.

Governance & Approval Focus

Pulls together document details, stakeholder reviews, approvals, and implementation actions into a clear summary in one click.

7

Similar Risks Found

Dashboard & Report

Pulls document data instantly to create clear visual reports and in-depth governance analysis.

Purpose-Built for Governance Excellence

OPERATIONAL CAPABILITIES

Role-Based Access Controls

Role-based access controls, configurable permissions, and approval workflows to ensure secure governance processes and compliance with organizational policies and governance requirements.

Automated Notifications & Alerts

Real-time notifications for approvals, document reviews, contract renewals, policy updates, governance activities, and pending actions to ensure timely decision-making and effective governance oversight.

Configurable Approval Workflows

Configurable approval workflows with multi-level approvals and role-based routing for organizational documents, policies, contracts and compliance checklists review processes.

Branding Customization

Customize the system with your organization's logo, colors, and branding elements to match your corporate identity.

Executive Dashboards & Reporting

Executive dashboards and reports providing real-time insights into governance performance and key oversight activities across the organization.

Controlled Collaboration

Enables secure collaboration through configurable workflows, role-based access controls, and approval processes, ensuring transparency, accountability, and effective governance.

Active Directory Integration

GovernanceVare supports Single Sign-On (SSO) through Microsoft Entra ID (Azure AD), enabling secure and seamless user authentication.

Enterprise Application Integration

Support integration with enterprise applications to enable seamless data exchange across systems.

Comprehensive Audit Trails

Maintain a history of user activities, changes, approvals, and actions with timestamps for transparency and accountability.

Mobile & Responsive Access

Access governance documents, policies, contracts, approvals, dashboards, and governance activities securely from desktops, tablets, and mobile devices anytime, anywhere.

CORPORATE PROFILE

About TransVare Corporation

Federated GRC: Specialized at the edges, Unified at the core.

ARCHITECTS OF FEDERATED GRC

TransVare, derived from **Transformation**, **Visibility**, and **Software**, pioneered Federated GRC: a new architecture for governance, risk, and compliance that is specialized at the edges and unified at the core. This naming logic runs through every module, where each product is Visibility Software for the discipline it serves. GovernanceVare is Governance Visibility Software, and the same pattern carries across the platform. TransVare is envisioned to federate every governance discipline into a single defensible view, serving enterprises, regulators, and governments across the globe.

Under Federated GRC, each GRC function retains its specialized depth, methodology, and ownership while operating on a shared foundation:

- **Shared data fabric** connecting every domain
- **Common taxonomy** across all disciplines
- **Unified intelligence layer** spanning the platform

Every domain is independently deployable, with its own owners, workflows, and KPIs, preserving the autonomy and expertise of each function.

The architecture extends beyond the core domains to encompass every domain within the space of a GRC Suite of Federated Solutions:

- **Enterprise Risk Management:** ERMVare
 - **Governance Management:** GovernanceVare
 - **Incident Management:** InciVare
 - **Compliance Management:** ComplianceVare
 - **Cyber Security Risk Management:** CyberVare
- And more...

Every domain federates upward into a unified governance plane, where risks, obligations, controls, incidents, and indicators connect across disciplines in real time.
